

**ONE CONSOLE OPERATES MULTIPLE RADIO SYSTEMS**

# MIP 5000 VoIP RADIO CONSOLE WITH MOTOTRBO

You can now reach all of your field personnel whether they use MOTOTRBO™, ASTRO® 25 or a conventional radio system from the MIP 5000 VoIP Radio Console.

The solution is inexpensive with no need for costly lease lines, simple to install and easy to use. Plus, you can implement it anywhere on your IP network: onsite, offsite or even wirelessly in a field dispatch facility.

## **SIMPLE, SIMULTANEOUS CONTROL**

The MIP 5000 Console can interface with trunked or conventional systems and works in parallel with your existing console to serve as a backup, or to facilitate migration from your current equipment.

The MIP 5000 Console can be easily installed at any network location (remote, on-site or as a mobile field-dispatch solution), and the Windows® user interface is simple and intuitive to learn and to use. The MIP 5000 Console works with your existing managed multicast and QoS enabled IP network, eliminating the need for expensive lease lines in most applications.

The MIP 5000 Console virtual control heads can mimic the control head for MOTOTRBO and ASTRO 25 so dispatchers can use features like push-to-talk (PTT) identification with alias, ASTRO 25 emergency alarms and MOTOTRBO text messaging from their console. The dispatcher can also use a simple drag and drop action to patch together dissimilar radios or connect an inbound call to a radio channel.

## **ADD THE INCREASED FUNCTIONALITY OF MOTOTRBO**

Combine the cost-effective and adaptable MIP 5000 Console with MOTOTRBO digital two-way communication for increased clarity, capacity and efficiency. The MIP 5000 Console supports MOTOTRBO Conventional, MOTOTRBO IP Site Connect, MOTOTRBO Capacity Plus, MOTOTRBO Linked Capacity Plus and now MOTOTRBO Connect Plus systems.

The MOTOTRBO digital platform rejects static and noise so communication is clearer over a far wider area than analog. Data applications also run more efficiently, creating an optimal environment for field personnel.

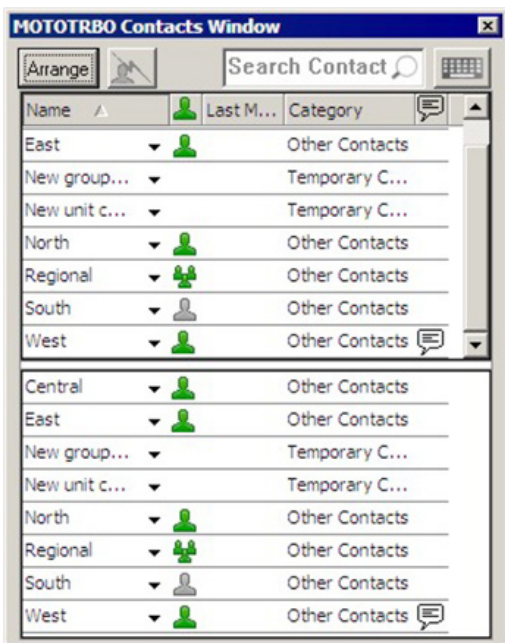

The MIP 5000 Console and MOTOTRBO together create an ideal solution for corporation and university campuses, hotel complexes, or any remote field office and command centers that need broad, flexible and affordable communication.

## **MIP 5000 VoIP RADIO CONSOLE**

is a single console that can command and control MOTOTRBO, ASTRO 25 and conventional radios using your IP network.

**MIP 5000 VoIP RADIO CONSOLE MOTOTRBO GATEWAY WITH XPR 4550 AND XPR 5550 (WIRELESS) IN MOTOTRBO MODE SUPPORTS THE FOLLOWING FEATURES FOR CONVENTIONAL, IP SITE CONNECT AND CAPACITY PLUS SYSTEM TYPES.**

- Talk, Listen
- Channel Steer / Talk Group Select
- PTT Alias ID
- Emergency Alarm and Call
- Private, Group and All Call
- Scan
- Keyboard and Keypad Texting
- Voice and Emergency Interrupt
- Presence Notification
- Automatic Registration Service

MOTOTRBO Contacts Window

**SAVE VALUABLE TIME WITH CONTACT LISTS AT YOUR FINGERTIPS**

Further strengthening the pairing of the MIP 5000 Console and MOTOTRBO, you can now view a contact list of both online and offline MOTOTRBO users by using the MOTOTRBO Automatic Registration Service. From the new MOTOTRBO contacts window, dispatchers can quickly send text messages, initiate private or group calls and improve your operational efficiencies.

**EXTENDED SUPPORT WITH MOTOTRBO CONNECT PLUS**

The MIP 5000 Console now supports virtual control head capabilities for MOTOTRBO Connect Plus radios. Features including PTT Alias IDs, Emergencies, and Channel Steering, give you the ability to take advantage of this scalable, multi-site, digital trunking system configuration to accommodate for the high volume, wide area communication your business requires.

**MOTOTRBO Connect Plus Supported Features:**

- Talk/Listen
- Channel Steer
- PTT Alias ID
- Private Call
- Group Call
- Scan
- Keypad Texting (XPR 4550 only)
- Emergency Alarm
